Fast Software Encryption 2024
IACR Transactions on Symmetric Cryptology

Call for Papers

General Information on FSE 2024

The 30th International Conference on Fast Software Encryption (FSE 2024)
Leuven, Belgium
March 25-29, 2024
General information: https://fse.iacr.org/2024/ and http://tosc.iacr.org/
Submission information: https://tosc.iacr.org/Submission

FSE 2024 is the 30th edition of Fast Software Encryption conference, and one of the area conferences organized by the International Association for Cryptologic Research (IACR). Original research papers on symmetric cryptology are invited for submission to FSE 2024. The scope of FSE concentrates on fast and secure primitives and modes for symmetric cryptography, including the design and analysis of block ciphers, stream ciphers, encryption schemes, hash functions, message authentication codes, (cryptographic) permutations, authenticated encryption schemes, cryptanalysis and evaluation tools, and security issues and solutions regarding their implementation.

Since 2017, FSE also solicits submissions for **Systematization of Knowledge** (SoK) papers. These papers aim at reviewing and contextualizing the existing literature in a particular area in order to systematize the existing knowledge in that area. To be considered for publication, they must provide an added value beyond prior work, such as novel insights or reasonably questioning previous assumptions. ToSC also accepts submissions for **addendum** and **corrigendum** (formerly known as errata) papers. Addendum papers aim at extending an existing ToSC paper in a novel, yet succinct way. The title of such papers must begin with "Addendum to", followed by the title of the initial paper. Corrigendum papers aim at correcting a significant error in an existing ToSC paper. Their title must begin with "Corrigendum to", followed by the title of the corrected paper. Addendum and corrigendum papers are limited to 4 pages excluding bibliography and will not be presented at FSE.

Publication Model

From 2017, FSE has moved to an open-access journal/conference hybrid model. Submitted articles undergo a journal-style reviewing process. Accepted papers are published in **Gold Open Access** (free availability from day one) by the Ruhr University Bochum in an issue of the newly established journal **IACR Transactions on Symmetric Cryptology**.

The yearly FSE event, to be held in a hybrid format, will consist of presentations of articles accepted to the IACR Transactions on Symmetric Cryptology journal, as well as invited talks and potentially social activities. This new model has been established as a way to improve reviewing and publication quality while retaining the highly successful community event FSE. For any further information, please view the FAQ page: https://tosc.iacr.org/FAQ.

For FSE 2024, authors can submit papers to the IACR Transactions on Symmetric Cryptology four times, every three months on a predictable schedule. Authors are notified of the decisions about two months after submission. In addition to accept and reject decisions, papers may be provided with **"minor revision"** decisions, in which case the paper is conditionally accepted and an assigned shepherd will verify if the changes are applied, **"major revision"** decisions, in which case authors are provided with a list of requested changes that are likely to result in the paper being accepted, or **"reject and resubmit"** decisions when the reviewers see some potential in the paper, but there are significant issues to address before the paper can be properly evaluated.

In case of "major revision" decision, authors are invited to revise and resubmit their article to one of the following two submission deadlines (respectively one month and four months after the notification), together with a statement explaining how the reviews have been addressed. We endeavor to assign the same reviewers to revised versions. Major revision papers will be considered to be under review during the four months window after the notification; authors must formally withdraw their paper if they wish to submit it to another journal or a conference/workshop with proceedings. If the paper is resubmitted after more than four months, it will be treated as a new submission.

In case of a "reject and resubmit" decision, the authors can resubmit their article, but must wait at least for the second next submission deadline (four months after the notification), because the paper requires significant editorial or technical changes. These papers are not considered under review, and the revision may receive the same reviewers or different reviewers. Rejected papers can only be resubmitted after significantly improving the results. Authors of rejected papers must wait at least for the third submission deadline (seven months after the notification) before resubmitting.

Papers accepted for publication before the end of January 2024 will be invited for presentation at that year's conference. Note that papers submitted in November can be deferred to the next year's conference in case of "major revision". **Note that starting 2024, presentation of accepted papers is only possible in person for authors physically attending FSE 2024. In-person presentation of accepted papers is highly encouraged. If no presentation is given in person, a long version of the talk has to be recorded before the conference and a short version (recorded or live) can optionally be shown at the conference.**

Timeline for FSE 2024 / IACR Transactions on Symmetric Cryptology 2023/2024

All upcoming deadlines are 12:00:00 (**noon**) Greenwich Mean Time (UTC)

IACR Transactions on Symmetric Cryptology, Volume 2023, Issue 2:
- Submission: 1 March 2023
- Rebuttal: 4-7 April 2023
- Decision: 1 May 2023
- Camera-ready deadline for accepted papers (and conditionally accepted): 28 May 2023

IACR Transactions on Symmetric Cryptology, Volume 2023, Issue 3:
- Submission: 1 June 2023
- Rebuttal: 4-7 July 2023
- Decision: 1 August 2023
- Camera-ready deadline for accepted papers (and conditionally accepted): 28 August 2023

IACR Transactions on Symmetric Cryptology, Volume 2023, Issue 4:
- Submission: 1 September 2023
- Rebuttal: 4-7 October 2023
- Decision: 1 November 2023
- Camera-ready deadline for accepted papers (and conditionally accepted): 28 November 2023

IACR Transactions on Symmetric Cryptology, Volume 2024, Issue 1:

- Submission: 23 November 2023
- Rebuttal: 2-5 January 2024
- Decision: 23 January 2024
- Camera-ready deadline for accepted papers (and conditionally accepted): 20 February 2024

Program Co-Chairs/Co-Editors-in-Chief

Christina Boura, University of Versailles, France
Kazuhiko Minematsu, NEC and Yokohama National University, Japan

Program Committee/Editorial Board

Nasour Bagheri, Shahid Rajaee University, Iran
Zhenzhen Bao, Tsinghua University, China
Xavier Bonnetain, Inria, France
Anne Canteaut, Inria, France
Wonseok Choi, Purdue University, United States
Carlos Cid, Simula UiB, Norway and Okinawa Institute of Science and Technology, Japan
Benoît Cogliati, Thales, France
Patrick Derbez, Univ Rennes, Inria, CNRS, IRISA, France
Itai Dinur, Ben-Gurion University, Israel
Orr Dunkelman, University of Haifa, Israel
Avijit Dutta, TCG-CREST, India
Maria Eichlseder, Graz University of Technology, Austria
Patrick Felke, University of Applied Sciences Emden/Leer, Germany
Antonio Flórez-Gutiérrez, NTT Social Informatics Laboratories, Japan
Lorenzo Grassi, Radboud University, The Netherlands
Chun Guo, Shandong University, China
Akinori Hosoyamada, NTT Social Informatics Laboratories, Japan
Ryoma Ito, NICT, Japan
Tetsu Iwata, Nagoya University, Japan
Ashwin Jha, CISPA Helmholtz Center for Information Security, Germany
Thomas Johansson, University of Lund, Sweden
Mustafa Khairallah, Seagate, Singapore
Virginie Lallemand, CNRS, France
Fukang Liu, Tokyo Institute of Technology, Japan
Yunwen Liu, Cryptape, China
Kalikinkar Mandal, University of New Brunswick, Canada
Silvia Mella, Radboud University, The Netherlands
Florian Mendel, Infineon Technologies, Germany
Bart Mennink, Radboud University, The Netherlands
Yusuke Naito, Mitsubishi Electric Corporation, Japan
Thomas Peyrin, NTU, Singapore
Shahram Rasoolzadeh, Radboud University, The Netherlands
Francesco Regazzoni, University of Amsterdam, The Netherlands and Università della Svizzera italiana, Switzerland
Raghvendra Rohit, TII, United Arab Emirates
Yann Rotella, University of Versailles, France
Dhiman Saha, IIT Bhilai, India
Santanu Sarkar, IIT Madras, India
Yu Sasaki, NTT Social Informatics Laboratories, Japan and NIST Associate, United States
André Schrottenloher, Inria, France
Yannick Seurin, Ledger, France

Meltem Sönmez Turan, NIST, United States
François-Xavier Standaert, UCLouvain, Belgium
Ling Sun, Shandong University, China
Siwei Sun, University of Chinese Academy of Sciences, China
Tyge Tiessen, DTU, Denmark
Yosuke Todo, NTT Social Informatics Laboratories, Japan
Aleksei Udovenko, University of Luxembourg, Luxembourg
Damian Vizár, CSEM, Switzerland
Lei Wang, Shanghai Jiao Tong University, China
Qingju Wang, Luxembourg

Instructions for Authors

Submissions must not substantially duplicate work that any of the authors has published in a journal or a conference/workshop with proceedings, or has submitted/is planning to submit before the author notification deadline to a journal or other conferences/workshops that have proceedings. Accepted submissions may not appear in any other conference or workshop that has proceedings. IACR reserves the right to share information about submissions with other program committees and editorial boards to detect parallel submissions and the IACR policy on irregular submissions will be strictly enforced.

The submission must be written in English and be anonymous, with no author names, affiliations, acknowledgments, or obvious references. It should begin with a title, a short abstract, and a list of keywords. The introduction should summarize the contributions of the paper at a level appropriate for a non-specialist reader. The submission must be typeset in the `iacrtrans` LaTeX class, available at https://github.com/Cryptosaurus/iacrtrans/releases. The class documentation includes examples and instructions to easily convert a paper written with the `llncs` class. The submission must be submitted electronically in PDF format. A detailed description of the electronic submission procedure is available at https://tosc.iacr.org/Submission.

In order to improve the quality of the review process, authors will be given the opportunity to enter a **rebuttal** between the indicated dates, after receiving the reviews.

The page limit for regular papers is 20 pages excluding bibliography. Authors are encouraged to include supplementary material that can assist reviewers in verifying the validity of the results at the end of the paper. Supplementary material that does not require extra reviewing effort (such as test values, source code, or charts) will be published with the paper, but are not included in the page count. However, material that requires careful reviewing (such as proofs of the main theorems) will be included in the page count, even if they are written as appendices.

If authors believe that more details are essential to substantiate the claims of their paper or to provide proofs, they can submit a longer paper (with no page limit); this should be indicated by checking the box "Long Paper" in the submission server (and no more by appending the phrase "(Long Paper)" to the title). For long papers of up to 40 pages, the decision may be deferred to the next round at the discretion of the editors-in-chief (and to the next FSE if submitted in November). For papers longer than 40 pages, the first round of review may be dedicated only to evaluating whether the length of the papers is justified by the scientific contribution. Moreover, the decision may be deferred by one or more rounds at the discretion of the editors-in-chief.

Submissions not meeting these guidelines risk rejection without consideration of their merits.

Conflicts of Interest

Authors, program committee members, and reviewers must follow the new IACR Policy on Conflicts of Interest available at https://tosc.iacr.org/Call#coi. In particular, we require authors to list potential conflict of interest with editorial board members at the time of submission, taking into account the set of all authors, and to explain the reason of each conflict.

Conference Information and Stipends

The primary source of information is the conference website. A limited number of stipends are available to those unable to obtain funding to attend the conference. Students, whose papers are accepted and who will present the paper themselves, will receive a registration fee waiver funded by the IACR Cryptography Research fund for students; they are encouraged to apply for additional assistance if needed. Requests for stipends should be sent to the general chair.

Contact Information

All correspondence and/or questions should be directed to either of the organizational committee members:

General Co-Chairs
Svetla Petkova-Nikova, COSIC, KU Leuven, Belgium
Siemen Dhooghe, COSIC, KU Leuven, Belgium
